WORK EXPERIENCE

Freelance
Full stack Developer   May 2025 –Present

Developing and publishing mobile apps using Flutter with AI features like chatbots and real-time data. Successfully launched 5+ apps and 3+ data-driven projects, helping clients improve their digital presence and automation capabilities.

Nextwys
Mobile App Developer   June 2024 - Feb 2025

- Launched a fully functional ride-sharing app with real-time maps. Implemented push notifications for real-time alerts and user engagement.
- Integrated Stripe and Taiwan bank APIs to enable secure and seamless payments. Implemented map snap-sharing features for precise location sharing. Integrated banuba SDK to apply advanced image filters and media enhancements.

Flutter studio
Mobile App Developer   Jan 2023 –May2024

- Integrated live session capabilities, enabling real-time instructor-led workouts and user interaction. Implemented receipt-to-image generation, with download and sharing functionality for easy records and reporting.
- Developed AI-powered applications, including AI-generated storybooks, images, and videos. Created a comprehensive gym and fitness application, incorporating exercise routines, calorie tracking, an equipment marketplace, and live training classes.

Center of advance sol CAS
Native Android Developer – intern   Sep 2021 - March 2022

- Learned core Java concepts and applied them through hands-on programming practice. Completed a workshop on native Android development using Java, building two real-world applications.
- Developed a Women Safety application with emergency and location-based features.

EDUCATION

THE ISLAMIA UNIVERSITY OF BAHAWALPUR
Bachelor's Degree in Computer Science
3.52/4.00 CGPA

PROJECTS

Chat Spark
Technologies Used: Flutter, Firebase, OpenAI APIs, Push Notifications
Live link

Developed and maintained Chat Spark, focusing on AI-driven question answering and personalized content with 100+ skill-building features, including language learning, test preparation, and interactive fun content.

Tempera- Time base eating
Technologies Used: Flutter, SQLite
Live link

Fasting app that helps users build a healthier relationship with food. It offers structured eating windows, personalized plans, and educational resources.

Rentfix - Rental Property App
Technologies Used: Flutter, Firebase, Firebase web hosting, Push Notifications, Stripe
Github link

Developed a cross-platform rental property app using Flutter and Firebase. Integrated real-time chat for tenant and property owner communication, and implemented electronic contract signing for a seamless rental process. Resulted in a 20% increase in user retention over 6 months.
